

Medicaid Cuts Are Bad Medicine

Medicaid Is a Boon to Arizona's Economy

In 2005, Arizona will spend just over \$6.0 billion on Medicaid. Of this, the federal government will contribute more than \$4.1 billion.¹ This \$6.0 billion dollar investment will give Arizona's economy a shot in the arm—stimulating state business activity and creating new jobs. Because Medicaid spending has an economic multiplier effect, each \$1 million that Arizona invests in Medicaid results in nearly \$4.3 million in new business activity and nearly 42 newly created jobs.²

Medicaid Is Essential to Arizona's Health Care Infrastructure

A substantial portion of Arizona's health care industry relies on Medicaid spending. Hospitals, nursing homes, and community health centers all depend on the Medicaid funds flowing into them to keep their doors open. In 2002, Medicaid payments infused Arizona's hospital system with nearly \$251 million.³ In addition, Medicaid is the primary payer for 66 percent of Arizona's certified nursing facility residents.⁴ Any cut in Medicaid funding will have a profound effect on the economic viability of Arizona's health care system.

Medicaid Offers a Helping Hand to Arizona's Most Vulnerable

In Arizona, Medicaid provided essential health services to more than 683,000 people in 2000. Of these, 391,000 were children, more than 84,000 were people with disabilities, and nearly 44,000 were elderly.⁵ For those in rural Arizona, particularly the elderly, Medicaid provides access to health care that they might otherwise have to go without. Children, people with disabilities, and the elderly—these are Arizona's most vulnerable groups. Ensuring that they have access to health care is the right thing to do.

Medicaid Provides Help in Desperate Times

Medicaid is essential to the security of Arizona and the United States as a whole. In times of need, Medicaid provides a cushion to protect both citizens and the economy. Medicaid is ready to respond to any sort of event—a terrorist attack, economic downturn, natural disaster, or public health catastrophe—that increases the need for health services and disrupts the economy. In the days and weeks following September 11, 2001, Disaster Relief Medicaid came to the aid of nearly 350,000 New Yorkers.⁶ Arizona's security hangs in the balance—will Medicaid be able to respond to such events in the future?

Medicaid Reduces the Number of Uninsured

Any cut in Medicaid funds will leave many Arizonans uninsured. In 2003, the Administration proposed cuts that would have resulted in thousands of Arizonans and other Americans losing coverage and becoming uninsured. The nation's Governors—from both parties—voiced such strong opposition that the proposal was shelved.
