

## Medicaid Cuts Are Bad Medicine

### Medicaid Is a Boon to Georgia's Economy

In 2005, Georgia will spend nearly \$7.5 billion on Medicaid. Of this, the federal government will contribute more than \$4.5 billion.<sup>1</sup> This \$7.5 billion dollar investment will give Georgia's economy a shot in the arm—stimulating state business activity and creating new jobs. Because Medicaid spending has an economic multiplier effect, each \$1 million that Georgia invests in Medicaid results in more than \$3.4 million in new business activity and nearly 31 newly created jobs.<sup>2</sup>

### Medicaid Is Essential to Georgia's Health Care Infrastructure

A substantial portion of Georgia's health care industry relies on Medicaid spending. Hospitals, nursing homes, and community health centers all depend on the Medicaid funds flowing into them to keep their doors open. In 2002, Medicaid payments infused Georgia's hospital system with more than \$3.0 billion.<sup>3</sup> In addition, Medicaid is the primary payer for 77 percent of Georgia's certified nursing facility residents.<sup>4</sup> Any cut in Medicaid funding will have a profound effect on the economic viability of Georgia's health care system.

### Medicaid Offers a Helping Hand to Georgia's Most Vulnerable

In Georgia, Medicaid provided essential health services to more than 1.2 million people in 2000. Of these, 698,000 were children, just over 198,000 were people with disabilities, and nearly 137,000 were elderly.<sup>5</sup> For those in rural Georgia, particularly the elderly, Medicaid provides access to health care that they might otherwise have to go without. Children, people with disabilities, and the elderly—these are Georgia's most vulnerable groups. Ensuring that they have access to health care is the right thing to do.

### Medicaid Provides Help in Desperate Times

Medicaid is essential to the security of Georgia and the United States as a whole. In times of need, Medicaid provides a cushion to protect both citizens and the economy. Medicaid is ready to respond to any sort of event—a terrorist attack, economic downturn, natural disaster, or public health catastrophe—that increases the need for health services and disrupts the economy. In the days and weeks following September 11, 2001, Disaster Relief Medicaid came to the aid of nearly 350,000 New Yorkers.<sup>6</sup> Georgia's security hangs in the balance—will Medicaid be able to respond to such events in the future?

### Medicaid Reduces the Number of Uninsured

Any cut in Medicaid funds will leave many Georgians uninsured. In 2003, the Administration proposed cuts that would have resulted in thousands of Georgians and other Americans losing coverage and becoming uninsured. The nation's Governors—from both parties—voiced such strong opposition that the proposal was shelved.
